

Search for information and scientific evidence at LILACS

CRICS9-BVS6
October 22-23th, 2012

BIREME/PAHO/WHO

Definition

- LILACS is an **index** and **repository** of literature on Health Sciences published in the Latin American and Caribbean countries;
- As a cooperative product, it has initiated the development of the **national capabilities** in the bibliographic control of the science produced by the countries.;
- It was created to improve the **visibility, access, and quality** of the scientific and technical literature in the region that was under represented in the international databases;
- It was created in 1985 with documents published from 1982 up to now.

Journals:

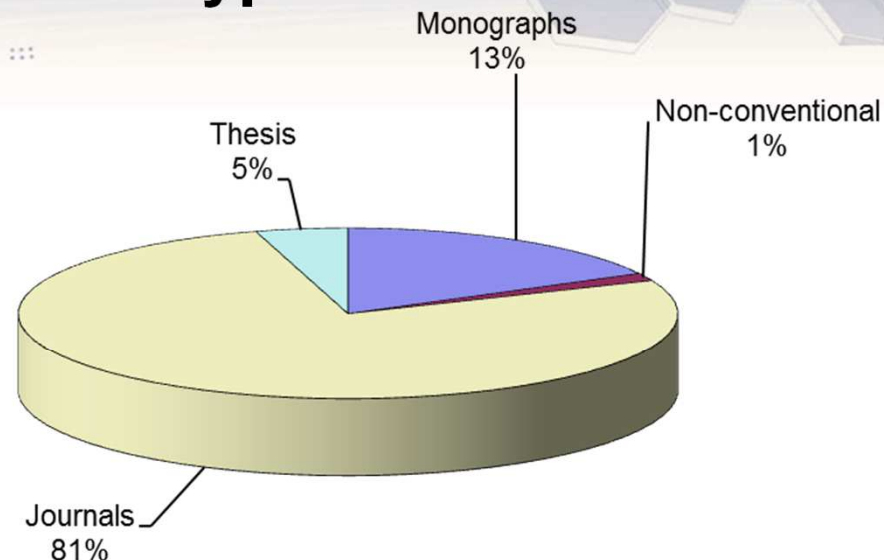

- **848** titles from **19** countries of Latin American and the Caribbean;
- **83** LILACS journals are also indexed in MEDLINE;
- **253** LILACS journals are also indexed in SciELO.

LILACS also indexes:

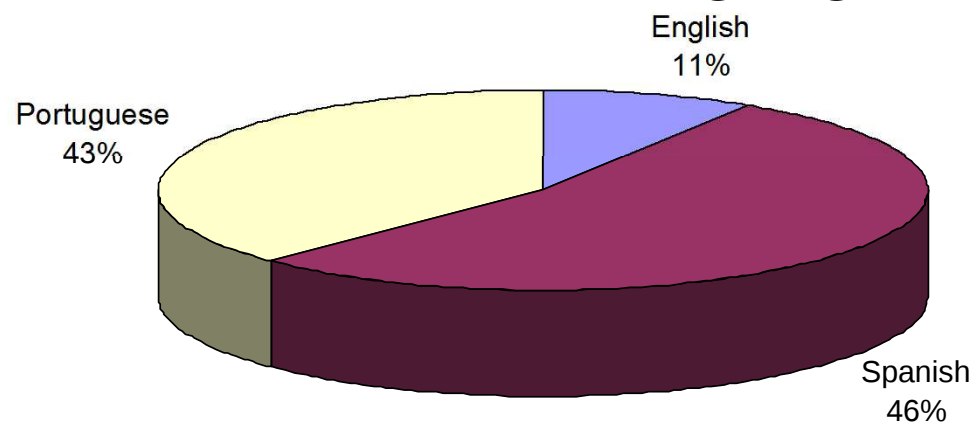

- Thesis;
- monographs, books and chapters of books;
- Reports;
- Governmental publications and regional international organizations publications;
- Health legislation;
- Statistics;
- Manuals and guides;
- Instructional material;
- Papers presented in Congress, Seminars and Meetings;
- Bibliography;
- Films, Video recordings, Nonmusical sound records*

*since 2006

Type of Literature

Publication Language

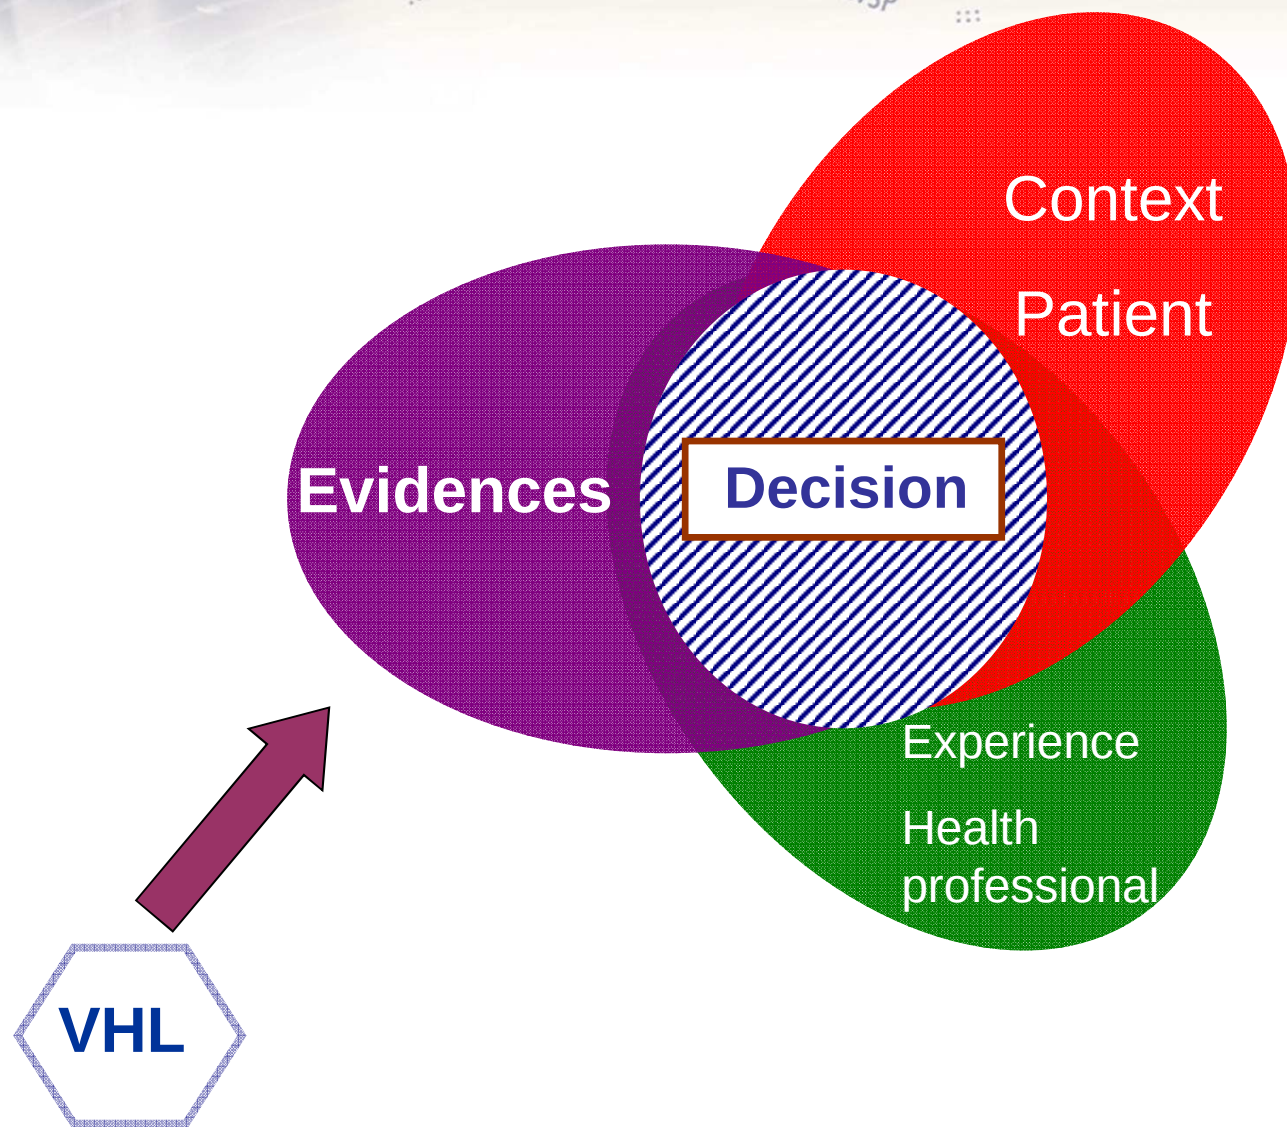

Evidence-Based Approach

Scientific evidence to qualify the process of decision making in health

Step-by-step approach based on evidence

- ✓ Ask questions about scientific evidence - need to convert the information into questions that can be answered (formulating the problem)
- ✓ Search with maximum efficiency, the best evidence (seeking answers to questions in a systematic method)
- ✓ Critically analyze the evidence, assess its validity (closeness to the truth) and usefulness (applicability)
- ✓ Making the decision to integrate evidence into clinical practice or public health
- ✓ Evaluation the result of action

Decision making in health

1. **Grupos de educação em saúde: aprendizagem HIV positivo people**
Author(es): Pereira, Audrey Vidal; Vieira, Ana Luiza Stiebler; Amâncio, ...
Trab. educ. saúde; 9(1)mar.-jun. 2011. tab.
Article [LILACS ID: lil-583333] LILACS Express Language(s): Portuguese
Atualmente a epidemia de HIV/Aids está disseminada em todo o país e no mundo, infectando milhares de pessoas nos diferentes ciclos da vida. Deste modo, estratégias de prevenção, tanto individuais quanto coletivas, permanecem imprescindíveis para reduzir e controlar as taxas de transmissão. O objetivo do artigo é analisar as percepções dos profissionais de saúde sobre as práticas de educação em saúde realizadas por meio de ações coletivas com pessoas soropositivas para o HIV. Este estudo qualitativo de abordagem descritiva foi desenvolvido com profissionais de saúde em cinco instituições do município de Niterói, Rio de Janeiro. Foram utilizados a técnica de entrevistas semiestruturadas e o método de análise de conteúdo. A educação em saúde (more)

Author(es): Soares, Cássia Baldini; Campos, Célia Maria Sivalli; Berto, Juliana Sette; Pereira, ...
Trab. educ. saúde; 9(1)mar.-jun. 2011. tab.
Article [LILACS ID: lil-583334] LILACS Express Language(s): Portuguese
O objetivo deste artigo é analisar como conhecimentos sobre consumo de drogas e juventude foram incorporados às práticas sociais de participantes de oficinas para debate, sensibilização e instrumentalização de trabalhadores de instituições sociais, ocorridas há três anos. Foram realizadas 13 entrevistas, utilizando-se roteiro com questões sobre: temas discutidos e estratégias utilizadas, contribuição para o desenvolvimento pessoal e profissional, análise de situações-problema. Os resultados indicaram que os participantes desenvolvem práticas no trabalho e na vida caracterizadas por compreender a rede de causalidade imbricada no consumo de drogas, que envolve reflexões sobre mercadorização da droga, problemas decorrentes da criminalização e do (more)

Trab. educ. saúde; 9(1)mar.-jun. 2011. .
Article [LILACS ID: lil-583335] LILACS Express Language(s): Portuguese
Para ser colocada em prática, a Vigilância da Saúde necessita que os trabalhadores de saúde estejam preparados para operacionalizá-la. O objetivo deste artigo é descrever a percepção de profissionais de saúde sobre as contribuições da articulação ensino-serviço para a implantação da Vigilância da Saúde. Trata-se de uma pesquisa qualitativa, realizada no Distrito de Saúde Escola Butantã, no município de São Paulo. Foram sujeitos da pesquisa médicos e enfermeiros que atuavam nas unidades de saúde da região. Os dados foram coletados mediante entrevistas e analisados segundo a técnica do discurso do sujeito coletivo. Os resultados mostraram que, segundo os profissionais de saúde, a articulação ensino-serviço se efetiva pela supervisão dos al (more)

Rev. bras. ecocardiogr. imagem cardiovasc; 24(2): 50-53, abr.-jun. 2011. ilus
Article [LILACS ID: lil-583508] Language(s): Portuguese
Publication type: Case Reports
Nas últimas décadas, observaram-se avanços na investigação e manejo da doença cardiovascular e uma redução significativa como causa da mortalidade. Entretanto, a doença cardiovascular permanece como a principal causa de morte, em vários países, inclusive no Brasil. Identificar o indivíduo de maior risco para eventos cardiovasculares é de grande importância para que seja possível intensificar e enfatizar medidas de prevenção. As ferramentas diagnósticas não invasivas evoluíram e conseguiu-se, hoje, com boa margem de segurança, identificar os pacientes que mais se beneficiarão dos procedimentos de revascularização do miocárdio, em relação ao tratamento medicamentoso, principalmente, pelo uso da cintilografia do miocárdio. Dúvidas ainda per (more)

Author(es): Vieira, Marcelo Luiz; Hotta, Viviane Tiemi; Mathias Junior, Wilson
Rev. bras. ecocardiogr. imagem cardiovasc; 24(2): 54-58, abr.-jun. 2011. tab, ilus
Article [LILACS ID: lil-583509] Language(s): Portuguese
Publication type: Case Reports
Vários parâmetros ecocardiográficos têm sido utilizados para a obtenção da programação mais adequada do marca-passo biventricular, em pacientes com insuficiência cardíaca avançada e submetidos à terapia de ressincronização cardíaca. Nesse contexto, a análise do dP/dt positivo e negativo é técnica rápida, reprodutível e muito acessível, e pode fornecer informações úteis à definição da melhor programação. O melhor ajuste dos intervalos atrioventricular e ventriculo-ventricular deve levar em consideração o caráter global dos diversos parâmetros ecocardiográficos analisados. (AU)

DeCS

Health Sciences Descriptors

Trilingual and structured vocabulary created by BIREME – English, Spanish, Portuguese

It is developed from the MeSH

Over than 90 thousand DeCS/MeSH descriptors

Over than 100 thousand synonyms

Over than 4 thousand additional terms – DeCS terms

Searching in DeCS

The image shows the home page of the DeCS (Health Sciences Descriptors) website. The header includes the 'vhl' logo and the text 'DeCS Health Sciences Descriptors'. In the top right corner, there are links for 'português' and 'español', both of which are circled in red. On the left side, there is a navigation menu with the following items: 'About DeCS', 'DeCS Search' (circled in red), 'DeCS news', 'DeCS User Support', and 'DeCS Services'. The 'DeCS news' item has sub-links for 'DeCS 2011 edition' and 'DeCS previous editions'.

The image shows the 'DeCS Search' interface. At the top, it says 'DeCS Health Sciences Descriptors'. Below this, the title 'DeCS Search' is followed by a help icon. The 'Language of Descriptors' section has three radio buttons: 'English' (selected), 'Spanish', and 'Portuguese'. There are two main search sections: 'Search by Word' and 'Search by Index'. The 'Search by Word' section has a text input field and two radio buttons: 'Word or Term' (selected) and 'Exact Descriptor'. The 'Search by Index' section has three radio buttons: 'Alphabetical', 'Keywords in Context' (circled in red), and 'Tree'. A red arrow points to the 'Index' button in the 'Search by Index' section. Both the 'Keywords in Context' radio button and the 'Index' button are circled in red.

 Article [LILACS ID: lil-554535] Language(s): English; Portuguese
 OBJETIVO: Analisar o desempenho do Programa Farmácia Popular do Brasil perante os setores público e privado, em relação a: disponibilidade, preço e custo, para o paciente, de medicamentos para hipertensão e diabetes. MÉTODOS: Foi utilizada a metodologia desenvolvida pela Organização Mundial da Saúde em conjunto com a Ação Internacional para Saúde, para comparação de preços e disponibilidade de medicamentos. A pesquisa foi aplicada em maio de 2007, em estabelecimentos de diferentes setores [público, privado e as modalidades própria (FPB-P) e expansão (FPB-E) do Programa], em 30 municípios do Brasil. Os quatro medicamentos analisados foram: captopril 25mg e hidroclorotiazida 25mg, para hipertensão, e metformina 500mg e glibenclamida 5mg, para diab (more)

2. **Bioavailability of vitamin D3 in non-oily capsules: the role of formulated compounds and implications for intermittent replacement/ Biodisponibilidade da vitamina D3 em cápsulas não oleosas: o papel das formulações manipuladas e as implicações para a substituição intermitente**
 Author(es): Coelho, Iara Maria Gomes; Andrade, Luana Dias de; Saldanha, Lunnara; Diniz, Erik Trovão; Griz, Luiz; Bandeira, Francisco
 Arq Bras Endocrinol Metabol; 54(2): 239-243, Mar. 2010. graf, tab.
 Article [LILACS ID: lil-546269] Language(s): English
 Publication type: Randomized Controlled Trial
 OBJECTIVE: To evaluate the bioavailability of vitamin D in capsules as compared with oily drops in nuns living in a closed community with very low sun exposure. METHODS: A randomized, 2 x 2 crossover, open clinical trial was conducted, with 64 nuns, comparing capsules and oily drops (both containing vitamin D3 66,000 UI plus vitamin A 10,000 UI) to determine the bioavailability of vitamin D. RESULTS: The capsule formulation presented higher bioavailability than the oily drops. The area under the curve (AUC0-24) and area under the curve (AUC0-4) were significantly higher for the capsule formulation (p < 0.05).
 Subject(s): Adu Cholecalciferol/therapeutic use Vitamin D Deficiency Area Under Curve Biological Availability Capsules enchy/blood Vitamin D Deficiency/prevention & control

3. **Estudo comparativo de Sevoflurano e Sevoflurano em frascos de vidro e plástico/ Comparative study between generic Sevoflurano and Sevoflurano in glass and plastic bottles**
 Author(es): Pinto, Cláudia Du Bocage Santos; Miranda, Elaine Silva; Emmerick, Isabel Cristina Martins; Costa, Nilson do Rosário; Castro, Claudia Garcia Serpa Osorio de
 Rev Bras Anestes; 60(1): 1-10, jan. 2010. graf, tab.
 Article [LILACS ID: lil-554535] Language(s): Portuguese
 Publication type: Comparative Study; Randomized Controlled Trial
 JUSTIFICATIVA E OBJETIVOS: O sevoflurano é acondicionado em três tipos de recipientes. As diferenças de propriedades físico-químicas desses produtos se devem aos diversos processos de fabricação, embora sejam essencialmente idênticos quanto às provas de comparação química. Existe a hipótese de que a molécula do sevoflurano possa apresentar instabilidade química devido à formação de ácidos de Lewis em consequência do material utilizado para a fabricação dos frascos e do teor de água. O objetivo deste trabalho foi analisar a eficácia clínica do sevoflurano quando acondicionado em frascos diferentes. MÉTODO: Foram estudados 64 pacientes adultos distribuídos aleatoriamente em dois grupos: sevoflurano em frascos de vidro e sevoflurano em frascos de plástico. RESULTADOS: Não houve diferença estatisticamente significativa entre os dois grupos quanto à duração da anestesia, ao tempo de indução e de recuperação, ao tempo de intubação e ao tempo de extubação. CONCLUSÃO: O sevoflurano em frascos de vidro e de plástico apresentou resultados semelhantes quanto à eficácia clínica.

ABSTRACT

Background

Diseases caused by *Streptococcus pneumoniae* (*S. pneumoniae*) continue to cause substantial morbidity and mortality globally. Whilst pneumococcal polysaccharide vaccines (PPV) have the potential to prevent disease and death, the degree of protection afforded against various clinical endpoints and within different populations is uncertain.

Objective

To assess the effectiveness of PPV in preventing disease or death in adults. Adverse events were not assessed.

Criteria for considering studies for this review

We searched the Cochrane Central Register of Controlled Trials (CENTRAL) (The Cochrane Library 2007, issue 2); MEDLINE (January 1966 to June 2007); and EMBASE (1974 to June 2007).

Selection criteria

- A) Randomised controlled trials (RCTs) comparing PPV with placebo, control vaccines, or no intervention.
- B) Non-RCTs assessing PPV effectiveness against invasive pneumococcal disease (IPD).

Data collection and analysis
